Subject: Wilcox Oil Company Superfund Site - August 26 Mtg Follow-up
Date: Friday, August 28, 2015 2:05:25 PM

Hi Katrina,

Thank you for your presentation. I have addressed your questions regarding the items below:

Item 1

Do you agree there are several tribal governments are involved at the site? Muscogee (Creek) Nation, Sac and Fox Nation, and Cherokee Nation/Inter-Tribal Environmental Council, besides the area's historic Osage Nation, Wichita Tribes, and Caddo Nation ties. The Muscogee (Creek) Nation requested specifically that their Principal Chief's office be notified. I am sure either Judith Ausmus or James Williams can provide more specific information if you need it.

Item 2

Please add Cherokee Nation/ITEC to the site document review and notification of participation in site field activities.

Item 3

Please add Cherokee Nation/ITEC to the geophysical data review.

Item 4

Please add Cherokee Nation/ITEC to the Site survey for tribal cultural properties.

Item 5

You did not include the map as an attachment. Can you please send it?

Thank you again,
Diane

Subject: Wilcox Oil Company Superfund Site - August 26 Mtg Follow-up

Good Afternoon All, thanks you for participating in the meeting yesterday and talking with us about the site. I wanted to follow-up with the group on several items discussed. If you would like to visit the site during the field work, please let either Todd, ODEQ, or me know.

9750747

1. Site Information Letters: It was requested of EPA to provide a letter informing and updating the Tribal Government about the Wilcox Oil Company Site.
2. Site Technical Team: The site technical team will include those individuals that are interested in the review of site documents and the participation in site field activities. If you are interested and would like to be on the distribution list, please let me know. LeeAnne, Martin, and Johnnie have expressed interest thus far.
3. Geophysics Work: During the meeting, much interest was expressed in the use, output, and review of the geophysical data we plan to gather. In addition, there was interest in visiting the site during this activity. As we move forward with our field work, we will share information with the group for review and input. This review and input will also be used to develop our next field screening activity involving the direct push/light induced fluorescence work.
4. Site survey for tribal cultural properties: As part of the site review, there was interest in walking the site and looking for cultural and tribal resources. With the end of the growing season quickly approaching, the best time to do this would be prior to the end of October. The weeks of September 14 or 21 were identified as potential timeframes. The cultural preservation department will coordinate with their group in order to identify the best times for our visit.
5. Potential Historical areas of interest: During the meeting, several potential areas of interest were identified (see bullets below). A copy of the 1897 GLO Map is attached for reference.
 - Old Road from Sapulpa
 - TA Baxter house
 - Potential graves sites: these may be present given the fact that this land was allotment land

If I have missed anything, please let me know. Thank you for your continued interest.
